## Step 3: Sketching the Basic Shapes

Start by creating the foundational shapes that define the animal's body. Use light, loose strokes to sketch the overall form, focusing on capturing the correct proportions and posture.

## Step 4: Refine the Sketch and Add Details

Once the basic shapes are established, refine the sketch by adding details such as eyes, nose, mouth, ears, and fur. Use a variety of pencil strokes to create depth and texture.

## Step 5: Shading and Creating Depth

Use a range of pencil values from light to dark to shade your drawing. This adds dimension and brings the animal to life. Gradually transition from light to dark areas to create smooth gradients and avoid harsh lines.

## **Step 6: Painting the Animal**

If you're painting your animal, transfer your sketch to the watercolor paper or canvas. Use thin washes of paint to create the base colors, gradually building up layers until you achieve the desired effect. Experiment with different colors and techniques to create unique and vibrant animal paintings.

## **Step 7: Highlighting and Finishing Touches**

Once the base colors are dry, add highlights to emphasize certain areas and give your animal a three-dimensional look. Use a white or light-colored paint to create highlights on the eyes, nose, and fur. Finally, add any finishing touches, such as whiskers or other details, to complete your artwork.
