Child poverty is a persistent and complex issue that affects millions of children around the world. It is a violation of children's rights and has profound consequences for their health, well-being, and future prospects. Reducing child poverty is essential for creating a more just and equitable society for all.

This roadmap outlines a comprehensive set of strategies to reduce child poverty. These strategies are based on evidence and experience, and they have been shown to be effective in improving the lives of children.

Strategies to Reduce Child Poverty

There are a variety of strategies that can be used to reduce child poverty. These strategies include:

- **Investing in early childhood education:** Early childhood education is one of the most effective ways to reduce child poverty. Studies have shown that children who participate in high-quality early childhood education programs are more likely to succeed in school, earn higher incomes, and avoid poverty as adults.
- **Expanding access to affordable housing:** Affordable housing is essential for families to escape poverty. When families have a safe and stable place to live, they are more likely to be able to afford other necessities, such as food, healthcare, and education.
- **Providing income support to families:** Income support programs, such as the Earned Income Tax Credit (EITC) and the Child Tax Credit (CTC), can help families make ends meet and reduce child poverty. These programs provide tax breaks or cash payments to low-income families with children.
- **Improving access to healthcare:** Children who have access to affordable healthcare are more likely to be healthy and succeed in school. Health insurance programs, such as Medicaid and the Children's Health Insurance Program (CHIP), can help families afford the healthcare their children need.
- **Providing support for parents:** Parents play a critical role in reducing child poverty. When parents have the skills and resources they need to care for their children, they are more likely to be able to provide a stable and nurturing environment for them.
- **Changing policies that perpetuate poverty:** Some policies, such as minimum wage laws and housing discrimination, can perpetuate

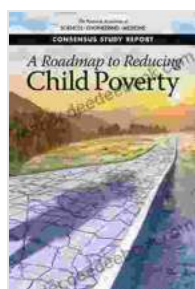

poverty. By changing these policies, we can make it easier for families to escape poverty.

Child poverty is a serious problem that has profound consequences for children and society as a whole. However, it is a problem that can be solved. By investing in proven strategies, we can create a more just and equitable society for all children.

This roadmap provides a path forward for reducing child poverty. It is a roadmap that we must all commit to following if we want to create a better future for our children.
